

ABSTRACT OF THE DISCLOSURE

5 A disk unit for reading information from
or writing information to a disk by means of a head
supported by an actuator includes a shroud having a
face perpendicular to a surface of the disk and
opposing a peripheral edge of the disk, and a
spoiler having a given height in a direction
perpendicular to the surface of the disk and
10 extending above the surface of the disk from the
peripheral edge to a center of the disk.
